“Rheum” for Improvement: Review of Rheumatoid Arthritis Treatment Guidelines

Session Date: 09/20/2022

Session Time: 11:00 – 11:45 AM (CST)

Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including pharmacists, RNs, APRNs, PAs, MDs.

Activity Overview

The 2021 update to the American College of Rheumatology (ACR) Guideline for the Treatment of Rheumatoid Arthritis (RA) demonstrates that the treatment of RA is rapidly evolving. Historically, patients with RA had been treated with conventional synthetic disease-modifying anti-rheumatic drugs (DMARDs). Currently, there are five different classes of biologic therapies, in addition to targeted synthetic Janus-kinase (JAK) inhibitors. With more treatment options being approved each year, choosing appropriate therapy becomes challenging. This presentation will provide a review of the 2021 ACR rheumatoid arthritis guidelines and the new data regarding cardiovascular concerns with JAK inhibitors, as well as discuss selection of pharmacotherapy based on patient specific factors.

Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Explain the pathophysiology of rheumatoid arthritis (RA)
2. Describe the literature regarding cardiovascular risks with Janus-kinase inhibitors
3. Recognize appropriate initial therapy based on patient specific factors
